

ROCKET BOOK EVERLAST

We designed the Everlast to be a reusable notebook that you can use again, and again, and again...

Important Tips

Only use the Everlast with FriXion pens and markers made by Pilot. You can find replacements and different styles and colors in stores everywhere.

To prevent smudging, allow 15 seconds for the FriXion pen ink to dry and physically bond to the page.

Erase your pages by dampening part of a towel with water and using that part to wipe the page. Then take the dry portion of the towel to dry the page completely. Any towel or paper towel will do, and a microfiber towel works best.

Only write on pages that are completely dry. Writing on a damp page doesn't work well, and it can damage the surface of the page. Bearing down very hard while writing can also permanently scratch the receptive coating of the pages.

Rocketbook also makes the Rocketbook Wave, which is another reusable notebook you erase in your microwave oven. The Everlast is not to be confused with the Wave - do not microwave your Everlast.

Frixion pen ink disappears when it gets over 140F / 60C. If you leave the book in a hot car your writing may appear very faded. To bring it back, pop it in the freezer for 20 minutes. Seriously.

Have fun re-using the Everlast!

Only Use Pilot FriXion Pens

ROCKET BOOK

Prepare for launch

Download the app and start your journey at
everlast.getrocketbook.com

All systems go

Inside the app, set up your Rocket Symbols to create your organization system. There are seven symbols at the bottom of each page. Think of each symbol as a subject in your notebook.

For each symbol, select a cloud service and set a place inside that service.

Example: Student

-  Journal sent to personal email
-  "Chemistry" folder in Google Docs
-  "History" folder in Google Docs
-  "Biology" folder in Google Docs
-  "English" folder in Google Docs
-  "Math" folder in Google Docs
-  "Shared Team" folder in Dropbox

Example: the CEO of Rocketbook

-  "Team Meetings" in Evernote
-  "Customer Meetings" in Evernote
-  "General Work" in Evernote
-  "Ideas" folder in Dropbox
-  Email to spouse
-  Slack to #general channel
-  Slack - prompt me for destination

Takeoff

When you mark a symbol on a page, and then scan that page with the app, Rocketbook blasts those notes to the right place, instantly organized for you.

Rocketbook supports email, Google Docs, Dropbox, Box, Evernote, Slack, iCloud, and Microsoft Onenote.
